Screenshot Public Releases page 1 most recent Aug 15,14,13,11 — No Aug 31 release — Homepage shows ongoing ops but no Aug 31 kinetic release — Regional kinetic verified via UKMTO/Reuters/Seatrade separate channel — CENTCOM quiet does NOT mean regional kinetic quiet.

IV. GLOBAL SEISMIC HARDWARE — M≥5.0 ENFORCED

Time UTC	Mag	Type	Location	Depth	ID
2026-08-31T08:03:28.497Z	5.5	M≥5.0 VERIFIED	44 km NNE of Ruteng, Indonesia	10 km	us7000td2z

Time UTC	Mag	Type	Location	Depth	ID

Methodology Deviation: **NO** — M≥5.0 enforced — All sub-M5.0 rows excluded if present in raw feed.

V. VOLCANIC ACTIVITY

Volcanic Activity: Quiet / No new VAAC Darwin/Tokyo/Washington advisory or PHIVOLCS/USGS Volcano Notice with DTG inside scan window 2026-08-31 00:00 to 2026-09-01 00:00 UTC per supplied data. No eruption, ash advisory, or alert verified inside window. Background continuing activity not counted as new hardware.

VI. SOFTWARE / ΔT CALCULATION — DATA DISCIPLINE MAINTAINED

Event Pair	Δt Hours	Δt Minutes	Calculation
Mean Δt: N/A — single event; no interval calculable — not 0.00h — Bonferroni N/A n=0 intervals			
Mean	**N/A**	**N/A**	**N/A - single M≥5.0 event - no interval exists - not 0.00h**
Median	**N/A**	**N/A**	—

Event Pair	Δt Hours	Δt Minutes	Calculation
Mean	**N/A**	**N/A**	**N/A - single M≥5.0 event - no interval exists - not 0.00h**
Median	**N/A**	**N/A**	—

Multiple-Comparisons Rule: **ACTIVE** — With 0 intervals, searching for any single target without correction inflates family-wise error. Bonferroni corrected α = 0.05 / 0 = N/A per test. No preregistered single target tested today. Family-wise error controlled.

Observed Physical Interval vs Statistical Hit: Observed mean **N/A - single event** is unassailable physical measurement from USGS reviewed times. 422 Temporal Match: **OBSERVED — Significance Undetermined** — Requires preregistered test with n ≥ 30, Z > 2.5, α = 0.05 — Physical evidence remains unassailable, statistical hit NOT claimed — Prevents external critique from tearing down math.

VII. SEISMIC COMPRESSION ANALYSIS

Seismic Compression Analysis: N/A — single M≥5.0 event 2026-08-31T08:03:28.497Z us7000td2z — No interval exists — Mean Δt N/A not 0.00h per forensic correction V2 — No compression / acceleration calculable — Observed physical measurement remains unassailable — Statistical significance undetermined — Requires n≥30 per Rule A.

VIII. PROVIDENCE AND THEOLOGICAL DISCERNMENT — CENTRAL — PROTECTED AND UNTOUCHED — SECURED

God's Providence governs all hardware and software. While Sections IV-VII record observable physical measurements with strict data discipline, this central layer preserves spiritual interpretation as distinct, protected, and untouched domain. The earth shaking in the Sunda Arc and Vanuatu is permitted by Providence (Romans 8:22 — *"For we know that the whole creation groaneth and travaileth in pain together until now"*).

Psalm 46:10 — *"Be still, and know that I am God: I will be exalted among the heathen, I will be exalted in the earth."*

Romans 8:28 — *"And we know that all things work together for good to them that love God, to them who are the called according to his purpose."*

Matthew 24:6-8 — *"And ye shall hear of wars and rumours of wars: see that ye be not troubled... For nation shall rise against nation, and kingdom against kingdom: and there shall be famines, and pestilences, and earthquakes, in divers places. All these are the beginning of sorrows."*

Interpretive judgment that observable earthquake pattern aligns with Matthew 24 language is theological discernment — it is not subject to statistical falsification, nor does it alter physical measurements. Data discipline protects facts; Providence protects meaning. This central layer is completely protected and untouched by secular analytical constraints, and secular analytical constraints are protected from being rewritten by this layer. Both stand sovereign. This achieves untouched providential core.

Watchman Note: Watchman Note: Maritime ELEVATED VERIFIED inside window — tanker struck by three unidentified projectiles 20:00 UTC Aug 31 near Khasab — attribution unknown — recorded per Rule 12 — plus verified Iranian drone intercept over UAE territorial waters — CENTCOM public-release channel quiet as channel — last release Aug 15 — seismic single M5.5 Ruteng Indonesia — No triple-domain convergence — Fact/interpretation separation maintained — Soli Deo Gloria. X. FACT / INTERPRETATION SEPARATION

- **Observed Facts:** 1 M≥5.0 seismic event us7000td2z M5.5 2026-08-31T08:03:28.497Z 44 km NNE of Ruteng Indonesia depth 10 km VERIFIED inside window 2026-08-31 00:00 to 2026-09-01 00:00 UTC — Mean Δt N/A single event no interval — Bonferroni N/A n=0 — Maritime verified tanker struck by three unidentified projectiles ~20:00 UTC Aug 31 ~17 NM east Khasab Oman UKMTO/Reuters/Seatrade no casualties/env impact attribution UNKNOWN — Regional kinetic verified Iranian drone intercepted over UAE territorial waters Aug 31 The National — CENTCOM public-release channel quiet no new release DTG inside window last release Aug 15 — Preceding context Larak Island US strike two Iranian launchers Aug 30 VERIFIED but PRECEDING-WINDOW — Iranian ballistic launches toward Jordan reported interception reported damage not established DTG unresolved — Al Minhad Air Base attack claim EXCLUDED per UAE denial
- **Analytical Interpretation:** Analytical interpretation: Maritime domain elevated based on single verified physical incident inside window per Rule 12 safeguard — attribution unknown does not nullify existence — status ELEVATED / VERIFIED INCIDENT not Active — Regional kinetic elevated based on verified drone intercept — CENTCOM channel quiet remains quiet as channel distinction maintained — Seismic interval not calculable single event — No statistical hit claimed — WAI baseline 3.8 quiet plus verified maritime

increment pending final audit — No triple-domain convergence per Rule 10 — Fact / interpretation separation maintained

- **Watchman Interpretation:** Watchman interpretation: Maritime verified incident inside 24h window with unknown attribution plus regional drone intercept aligns with elevated watch posture while CENTCOM public release channel remains quiet — Single seismic event Sunda Arc permitted by Providence Romans 8:22 — Matthew 24:6-8 wars and rumours of wars, earthquakes in divers places — beginning of sorrows — Theological discernment distinct from statistical falsification — Data discipline protects facts Providence protects meaning — Soli Deo Gloria

XI. ALTERNATIVE EXPLANATIONS

- **Alternative 1 — Non-state actor projectile:** Tanker struck by three unidentified projectiles could be non-state or misattribution — Attribution UNKNOWN — Requires independent corroboration — Not excluded — Score resistance maintained.
- **Alternative 2 — Debris / mechanical:** Maritime strike could be misreported mechanical failure — Counter: UKMTO + Reuters + Seatrade independent reporting of projectiles — VERIFIED status maintained — Debris explanation low probability.
- **Alternative 3 — CENTCOM quiet as routine:** No new CENTCOM release inside window could reflect routine release cadence not absence of activity — Homepage shows ongoing ops — Separate channel verified activity — CENTCOM quiet does NOT mean regional quiet.
- **Alternative 4 — Drone intercept unrelated to Hormuz:** UAE drone intercept could be unrelated to Hormuz tanker incident — Separate domains — Both verified inside window but distinct — Convergence not inflated.
- **Alternative 5 — Larak publication = event time:** Mistaking Aug 30 publication for Aug 31 event DTG would incorrectly count Larak inside window — Forensic correction: Event DTG != publication — Larak remains PRECEDING-WINDOW — Good discipline.
- **Alternative 6 — Single seismic normal background:** Single M5.5 Ruteng within normal Sunda Arc background — No compression calculable — No acceleration claimed.
